Dear Referral Partner,

Card Care Connection is dedicated to providing supportive and motivational handmade cards to those who are suffering from cancer. We are looking to you to bring this program to your clients who could benefit the most. Receiving a caring card with an uplifting message of hope and encouragement can make a real difference to someone who feels lonely and discouraged. The program is designed to help people cope with their illness, especially those with limited support systems.

The diagnosis of a life threatening disease such as cancer can be incredibly frightening. Treatments are often harsh, placing tremendous demands on both the body and spirit. The physical burden is very real, but the emotional struggle can be equally challenging. Finding the emotional strength to persevere or simply finding peace of mind can seem out of reach at times. Words of comfort and support can help to ease the mental burden of this disease and provide inspiration at a much-needed time.

Card Care Connection is devoted to enriching the lives of those affected by cancer. We are requesting referrals for our program. Below are referral guidelines.

- Any person with cancer can qualify as a potential recipient- this includes patients at any point of the disease process. Patients may be newly diagnosed, in treatment, or in remission for a period of time.
- There are no income, age, or geographical restrictions- we want our organization to be able to help individuals across the country regardless of demographics. The comfort and support our cards bring can benefit everyone.
- Although any patient may be referred, this program is designed especially for those with no family or a limited support system. Please keep in mind your clients who may be in extra need of comfort and support.

All personal information will be kept confidential. Please visit our website to make a referral. Thank you for your interest in supporting this program.

Sincerely,

Aleeza Granote, LCSW
Founder and Executive Director
